PROJECTS

- **TO DO APP**
Github : <https://github.com/veerendra9275/to-do-list.git>
Tech-stack : HTML, CSS, and Vanilla Javascript
Created a app where we can create a task, the task will we added in database we can delete also.
- **STOPWATCH**
Github : <https://github.com/veerendra9275/stopwatch>
Tech-stack : HTML, CSS, Javascript,
Created a Stopwatch where we can use this timer for sport or quiz to measure time duration. there are three buttons stop start and reset In this stopwatch to operate this.
- **SUPERHERO HUNTER APP**
Github : <https://github.com/veerendra9275/superhero-hunter>
Tech-stack : HTML, CSS, Javascript,
created a super hero hunter app in which we can search the particular character with its name. home page contain buttons like favorite where we can dd that superhero into favourite list, aslo it contains about button which will redirect user to information of superhero page. And project is about to fetch the superhero data
- **PORTFOLIO APP (REACT)**
Github : https://github.com/veerendra9275/Veerendra_React_Portfolio
Tech-stack : React, typed.js, Animation on scroll(aos)
Created a demo portfolio app where you can see all the information about user, like you can download his resume through the download button, see his experiences and you can also contact him etc. And you can see the typing animation on home page of this project and you can see attractive animation in whole project which is executed by animation on scroll (aos library)
