PROJECTS

- **TO DO APP**

  Github : https://github.com/veerendra9275/to-do-list.git

  Tech-stack : HTML, CSS, and Vanilla Javascript

  Created a app where we can create a task, the task will we added in database we can delete also

- **STOPWATCH**

  Github : https://github.com/veerendra9275/stopwatch

  Tech-stack : HTML, CSS, Javascript,

  Created a Stopwatch where we can use this timer for sport or quiz to measure time duration. there are three buttons stop start and reset In this stopwatch to operate this.

- **SUPERHERO HUNTER APP**

  Github : https://github.com/veerendra9275/superhero-hunter

  Tech-stack : HTML, CSS, Javascript,

  created a super hero hunter app in which we can search the particular character with its name. home page contain buttons like favorite where we can dd that superhero into favourite list, aslo it contains about button which will redirect user to information of superhero page.
  And project is about to fetch the superhero data.
